

DATAMINER INTEGRATION STUDIO

integrate any device from any vendor

DataMiner Integration Studio (DIS) is a brand new solution that makes creating, updating, troubleshooting and publishing DataMiner drivers easier and more efficient than ever before. Using extensive libraries with premade code snippets, DIS users can create drivers that can be published on a DataMiner System with a click of a button. While DataMiner is already integrated with many thousands of devices, now with DIS, the integration of any product from any vendor, regardless of interface or protocol required, is even further facilitated.

AUTOMATE

YOUR DATAMINER DRIVER IDE

DataMiner Integration Studio offers a wealth of features and capabilities, including four purpose-built editors:

- > a code editor, which features on-the-fly XML Schema validation and Intellisense
- > a QAction editor, which features full C# editing and debugging capabilities
- > a display editor, which allows you to design Data Display pages using simple drag-and-drop operations
- > a table editor, which allows you to design parameter tables using simple drag-and-drop operations

KEY FEATURES

- > **EASY NAVIGATION THROUGH DRIVERS**
navigate through drivers in a flash with a navigation panel, a link panel, and inline links
- > **CODE SNIPPET LIBRARIES**
automatically insert code snippets for a wide variety of typical XML structures and C# functions (helper classes)
- > **MIB IMPORTING**
import MIB files in order to automatically generate parameters, triggers, etc.
- > **DISPLAY EDITOR**
drag and drop parameters to create device user interfaces on the fly
- > **TABLE EDITOR**
create and design data tables instantly, leveraging the wealth of table features and capabilities available in DataMiner
- > **QUICK ACTION C# DEBUGGING**
use the DIS Inject tool to perform live step-through debugging of C# quick actions
- > **POWERFUL VALIDATION**
pinpoint issues in no time and test your drivers against more than 200 criteria with the automated QA validator
- > **PUBLISHING ON DMA**

YOUR BENEFITS

- > integrate any product from any vendor
- > save valuable development time
- > intuitive editors
- > easily import SNMP MIBs into your drivers
- > automatically insert code snippets

We will offer a complete **online training program** with both private and open training sessions. The training offers a comprehensive overview and provides a comfortable learning process, avoiding travel costs and lengthy absences from the workplace.

Find answers to your questions with our FAQ document, available from our **online customer portal DCP**. If you can't find your answer in the FAQs, contact sales@skyline.be.

UNLOCK THE FULL POTENTIAL OF DATAMINER WITH DIS

One DataMiner Integration Studio developer license is available **free of charge** for current DataMiner customers. For business partners, as well as for additional DIS user licenses per customer, conditions apply. Please contact sales@skyline.be for more information.
