U-SoA’s Fabrication Lab (FabLab) now includes a robotic arm. The FabLab is housed within the award-winning campus building by Arquitectonica and Coastal Construction, the Thomas P. Murphy Design Studio Building.
Message from
Dean Rodolphe el-Khoury

I am proud to welcome you to the University of Miami School of Architecture’s 2020 Career Fair!

At our School, the Career Fair represents a critical component of our students’ future successes and is part of a multi-pronged strategy for joining the classroom with the workplace.

The Career Fair aligns our students with internships, immersing them into real-world situations that complement their coursework with the invaluable lessons of professional experience. For graduating students, the Career Fair optimizes the transition to the profession by offering opportunities in some of the leading offices nationwide -- trusted partners whose exceptional capacity to extend and intensify the learning process is sought and valued.

U-SoA’s commitment to link academic excellence to professional relevance is implicit in the students’ profiles featured in this booklet. They evocatively communicate the career aspirations of future professionals preparing for the next stage of their journey. The profiles also demonstrate the diversity in backgrounds, orientation, ideas and skills that characterize our student body. This diversity is in the school’s DNA. It empowers our students in addressing current environmental and social challenges and in creating a more beautiful, equitable, and environmentally responsible world.

We thank you for your support in considering our students for employment and in bridging real-world practice with academia. Together, we pave the way for our future design leaders and take a valuable step in assuring their success.
U-SoA Professional Engagement

connecting our students to professions **globally**
The University of Miami School of Architecture is recognized for educating students for success in a wide range of career paths that make up our built environments.

#14 Most Hired From Architecture School
Design Intelligence Ranking 2019-20

Integrated Design and Professional Sponsored Studios
U-SoA brings professional leaders and real world design challenges into the classroom to drive innovation and engagement among students. Arquitectonica and Perkins + Will have partners with us to provided multi-year studio sponsorships focused on sustainability and resilient focused solutions.

PAIR | Professional Advancement, Internship + Research
Our programs immerse students off campus within host offices as both interns and research collaborators. Our network of partner offices are committed to mentoring and collaborating on research with students.

Internships & Part-Time Employment
U-SoA has expanded internship programs that connect our students to professional, non-profit and governmental offices globally.

Visiting Critic and Emerging Practitioner Fellowship
Visiting Critic program pairs national and international acclaimed architects with U-SoA faculty to co-teach design studios. Our Emerging Practitioner Fellowship supports up and coming professionals committed to expanding and advancing the culture of architecture and design through innovative practice or research.

Career Services
Together, University of Miami Toppel Career Center and U-SoA offer a multi-prong strategy to connect and support students, alumni and employers. Students benefit from: portfolio and resume workshops, interview skills, panel discussions, skill assessments, career crawls, mentoring, shadowing and career fairs. UM is a committed partner in the students’ employment goals and career building.
Graduating Students

looking for full-time positions
B.Arch Bachelor of Architecture
B.S.A.E./M.Arch Bachelor of Science in Architectural Engineering and a Master of Architecture
M.Arch I Master of Architecture I
M.Arch I AP Master of Architecture I Advanced Placement
M.C.M. Master of Construction Management
M.P.S. Master of Professional Science in Urban Sustainability and Resilience

Rome program, summer 2018
Open city studio: Tokyo Blue, summer 2019

Awards
First, Architecture Design & Theory Award | May 2018
Winner of Tishman Summer Scholarship | 2019

Skills
REFLECTION ON MODERN ARCHITECTURE
Modern architecture and nature more inclined to each independent, although the building itself is interesting enough to support its own meaning, but in terms of construction of the site is just an outsider even for other venues it can exist independently.

BLEND INTO NATURE & HISTORY
Before and after the site is surrounded by trees. I hope my design departure from the scene, to make the building functional requirements to both natural and uncompromising, the ups and downs in line with the needs of the flow line, capable of building a joint space in front of the group of trees to produce architecture and

FLUX AND PERMANENCE
As the nature is always changing, we want the museum be there meeting the alternation of time. No matter in spring or winter, it still could be like part of the site in different ways.

COMMUNICATION BETWEEN MAN AND NATURE
Avoid rough trees directly introduced inside the building, I will face the goal for building school field open, which is a by AC inside out, in flow lines, exhibition, service area has a natural indirect intervention. However, because of the different nature and different ways with the inner space, the inner region of the different arrangement of different feelings.
Jiayi Wang

M.Arch | Class of 2020
Bachelor of Mechanical Engineering | Huazhong University of Science & Technology, China, 2017

is a classic example of growth, where it responds to the developing needs of the city by providing multi-purposes spaces. This intervention aims at establishing new grounds for development which encompasses community living within the vertical urban park. Movements are derived through systems and growth is portrayed through rise. Interactions are captured, moments are harnessed and a beautiful journey is created.

American institute of Architecture Students (AIAS)
Women in Architecture

Skills
AutoCAD, Revit, Rhino, Sketchup, Lumion, InDesign, Illustrator, and Photoshop.

Fluent in English, French and Haitian Creole.
I have always been fascinated by the structure of the buildings involved in our daily lives. Through architecture, I seek to enhance the quality of life for people all over the world, whether it’s for personal desires or by essential needs. I cherish the idea of having the ability to design the place where one resorts to after a day filled with life activities, knowing that there, their desire for comfort is fulfilled. A place to separate or combine work and social life from personal life. I am passionate about reinforcing this necessity for the various needs and wants whether it’s through affordable or extravagant methods.

A few of my interests include real estate development and investment, property renovation, interior design, and sustainable practices. In 2018, I obtained my Real Estate license for the state of Massachusetts to further emerge myself into the business industry of residential development, thus allowing me to take part in the transactions that occur past the architectural concepts and construction of a building. In 2020, I gained LEED General Associate certification, to emerge myself in practicing within the realm of sustainability.

Skills
Ashanni McClam

B.Arch | Art Minor | Class of 2022
Axm2548@miami.edu

“Architecture has completely altered my thinking. I see the world not by how it appears, but by its imposition. Through considerate use of light and tasteful use of materials, I can elevate the mood of many lives. What a responsibility an architect has! Luckily, It is one I will gleefully bare.”

Ashanni McClam is a transfer art and interior architecture student from George Washington University. She boldly left her past program to completely engross herself into Architecture and a new city.

Her past professional experience includes graphic design, web design, and legal administration at OUTFRONT Media, Special Olympics, and the Department of Health and Human Services. Her volunteer experience includes managing the public relations departments for the National Organization of Minority Architects (NOMA), Women’s Leadership Network, and Black Student Union. She is currently a leader in the Fellowship of Christian Athletes (FCA).

She is a proud member of the American Institute of Architecture Students (AIAS), Women in Architect (WIA), Black Architects in the Making (BAM), National Organization of Minority Architects (NOMA), National Honor Society, and Alpha Kappa Alpha Sorority Inc. (AKA). She enjoys painting, drawing, sculpting, and wood-working. Lastly, She is proficient in the Microsoft Suite, Adobe Suite, AutoCAD, Rhino, Revit, and SketchUp.

Ashanni’s goal: To positively and effectively transform her community.
Kalil Mella

M.Sc.Arch  |  Class of Fall 2020  
B.Arch  |  Business Administration Minor  |  Class of 2016
