

MPS Community Education

21st Century Community Learning Center

2020/2021 Progress Report

Virtual Enrichment Classes

By the Numbers

At the four schools funded by our 21st Century Grant (FAIR, Washburn, Folwell and Wellstone)

457 K-12th grade students in Minneapolis participated in virtual programming

84% of students served self-identified as students of color

43% of students served use education benefits (Free and Reduced lunch)

38% of students served receive English Language Learner services

13% of the program population are individuals who receive some type of special education services during the school day

6% of students served identified as Homeless and Highly Mobile (HHM)

Students attended **2,022** hours of virtual programming and participated in over **200** different classes.

In addition to the **10** Community Partners that the grant sites worked with during the 2020/2021 school year, **51** MPS staff members, community volunteers and AmeriCorps members taught virtual enrichment classes.

What Parents Say

“My kids loved meeting with other kids. They loved participating in Cooking classes, Girls Inc. and K-Pop Club.”

“When my son was connected to After School he was engaged in class.”

“One night I was working (from home) late and I came out of my office well past the end of class. My student was still online in the program. The teacher stayed on and played with the kids. Such dedication! It was lovely!”

What Students Say

“My favorite part of after school is when I get to meet other students from different schools and play with my friends!”

“I had fun playing with my friends and meeting new teachers”

“After school gave me something to do that was better than online school.”
